Attn: Tony Campbell
PO Box 707
Winchester, KY 40392-0707**

Dear Mr. Campbell:

Please accept this letter as opposition to the effects anticipated by the changes and possible pollution of the watershed.

It has come to my attention that EKPC will be installing a new high-voltage transmission line near Southern Madison Water District's primary water source, Owsley Fork Reservoir. Likewise, I have been told EKPC intends to manage its easement by chemical spray. It's likely that the chemicals will infiltrate the watershed and affect the Reservoir - the principal drinking water of my district.

At this time SMWD has not been contacted or provided any information to dispute the above information creating the concerns expressed by the people we serve. Please provide any information available that I can share with the customers in my district if you believe the information regarding chemical corruption of the water being that I am being told about is untrue.

Sincerely,

Wayne Robinson, Superintendent

Seen and agreed:

Larry Todd, Chairman of the Board
